MIDDLESEX GASES & TECHNOLOGIES

LAB GAS SAFETY/PURITY AUDIT

Call us today to
find out about our
extensive on-site
safety/purity audits!

Are your gases stored safely?

Do you have gas purity issues?

Are you in compliance with safety/purity requirements?

Are you a good candidate for MicroBulk delivery?

Are you a good candidate for gas generators?

Is better technology available for your gas process?

Middlesex Gases & Technologies will answer those questions when it performs a safety/purity audit of your lab. We offer this service to both customers and non-customers.

Our safety/purity audit will:

- Assure that you are using the most appropriate grade of gas for your chosen application
- Confirm that your gas regulation equipment is not adding contaminants to your application
- Ensure that hoses or tubing connecting your regulators and cylinders are not contaminating your gases
- Verify that your lab is in compliance with all safety/purity regulations
- Apply new technology as relevant to your applications
